

Fish Habitat Partnership

November 29, 2024

Great Plains Fish Habitat Partnership Request for 2026 Aquatic Conservation Projects

The America Conservation Enhancement Act was passed in October, 2020 and made significant changes to project requirements and will affect how these project funds are distributed. This request is actually for the <u>FY2026</u> time period. We will continue trying to find ways to make this work efficiently as we navigate the process.

- All projects must show a minimum of a 1:1 <u>non-federal</u> financial match with the exception of projects proposed by tribal sponsors.
- Protection (including acquisition) projects are eligible.
- All NFHP funded projects must include an outreach/education component.
- Monitoring and evaluation measures must be included as part of the project application.
- Awards under this program are made under the authority of the America's Conservation Enhancement Act—National Fish Habitat Conservation Through Partnerships (<u>Pub. L. 116-188 [S. 3051]</u>, 134 Stat. 924-938).
- The National Board for NFHP have identified National Conservation Priorities that can be useful in developing project proposals. (National Fish Habitat Board Announces 2025 National Conservation Priorities | National Fish Habitat Partnership)
- Awards are made under the Assistance Listing Number and Title <u>15.608</u>, "Fish and Wildlife <u>Management Assistance</u>".
- Entities selected for funding under this program must register in the <u>System for Award Management</u> (SAM.gov) to do business with the federal government as a financial assistance recipient

It is time to ask for your consideration in submitting habitat project ideas for funding or support from the Great Plains Fish Habitat Partnership (GPFHP). The Great Plains FHP is one of twenty partnerships that span the nation under the initiative of the National Fish Habitat Partnership (NFHP). The GPFHP area of focus; rivers, streams, riparian corridors and watershed health of the northern half of the Great Plains that include habitats within all or portions of 10 states and 28 Tribes (see map).

This will be our seventeenth year of supporting conservation projects and working toward meeting the goals and objectives set forth in the GPFHP Strategic Plan (prairiefish.org). We have directed funding toward a wide range of aquatic conservation projects that benefit imperiled, endangered and recreational aquatic species. Most projects have received upwards of around \$10K to over \$50K. One of the partnerships' greatest strengths; is working together with partners to provide additional focus and resources for projects that align with the goals and objectives of shared efforts.

With your continued involvement, we can continue to strive toward a more strategic and focused conservation effort for future generations. With help from the habitat assessments, we can have discussions that help the partners bring landscape scaled issues into manageable projects by effectively focusing conservation with greater positive impacts to targeted species.

If you have an aquatic conservation project aligned with the goals and objectives of the GPFHP and need financial assistance, we encourage you to submit a proposal. Please fill out the included application and submit directly to me at Steven_Krentz@fws.gov.

Expected Timeline:

If you have any questions, please feel free to contact Steven Krentz, GPFHP Coordinator, at 701-355-8547 or Steven Krentz@fws.gov.

Project Application Instructions

Fish Habitat Partnership

Eligible Applicants: Eligible applicants include state and federal management agencies, non-governmental organizations (e.g. conservation groups, community associations, watershed councils, cooperatives, civic groups), municipalities, universities, schools, private landowners, and local and tribal governments.

Eligible Projects: Projects considered for funding must align with the goals and objectives of the GPFHP and may include watershed, riparian or in-stream habitat restoration, barrier removal or construction, population or watershed assessments needed for project evaluation, prioritization and planning, evaluating stream flows or lake water levels, and community outreach and education. Please review our Strategic Plan at Great Plains Fish Habitat Partnership (prairiefish.org).

What types of projects may NOT be funded?

Funding for projects are managed through FWS as the lead agency for the Department of the Interior. The GPFHP still assumes that funds may NOT be expended on the following activities under Section 1.8 of the original NFHAP Policy 717 FW 1. (If any of these activities is integral to a project under the strategic action plan, funds from other sources can support the activities, but not NFHAP funds. Those other funds may qualify as matching or leverage, however).

Ineligible expenditures.

- (1) Pre-award costs associated with preliminary design, surveys, and appraisals.
- (2) Operation and maintenance of facilities or structures. This applies to buildings and structures only and not to maintenance or construction of earthen structures.
- (3) Actions required by existing regulatory programs, except that funds may support activities under voluntary agreements that exceed regulatory requirements for conserving habitats (e.g., hydropower licensing in which the licensee enters into a voluntary agreement to restore habitat that exceeds regulatory requirements).
- (4) Projects that are primarily research studies (fish habitat assessment projects can be funded and are not considered research).
- (5) Long term monitoring projects (this includes long term monitoring of fish populations)
- (6) Incentive payments.

Project Duration: GPFHP prioritizes projects that can be completed within 18-24 months of receipt of funding. In some cases, GPFHP will consider funding phases or components of larger, long-term projects, as long as funds can be expended, objectives met, and benefits realized within the requisite 24-month period. Project requests for activities beyond 24 months are beyond the limitations that we can entertain at this time.

Available Funding: GPFHP typically allocates a total of \$100-\$200K annually across 3 – 5 individual projects. However, the exact amount of funding available to the partnership varies, annually, with final fund availability usually determined in the spring.

<u>Match Required:</u> Successful proposals should demonstrate close to a minimum 1:1 match or greater, which may include cash, time, materials, or other services. In addition, there are additional funding sources for fish passage projects that can be utilized through our prioritization process to help direct conservation funding.

<u>Deadline</u>: The deadline to submit a GPFHP project for the 2025 NFHP funding cycle is **January 14th**, 2025. In order to help applicants put forward the best possible projects for consideration by the Partners Council, GPFHP has a set of criteria by which projects are evaluated for funding. Applicants should address these criteria in their project applications. Please review the attached materials for project selection criteria and application instructions. All projects submitted are input into the Fish and Wildlife Service Fisheries Information System and sent to the National Board to be considered for funding.

Application Package:

The application package should contain the following four items:

<u>Cover Letter</u> - Include in your cover letter a brief narrative describing the overarching project goals and anticipated outcomes; why GPFHP funds are needed; how GPFHP funds will be spent; and how this project addresses GPFHP and NFHP funding priorities.

Completed Project Application

<u>Detailed Project Budget</u> – Indicate how project funds will be spent in detail

<u>Attachments</u> – A letter of support from the State Fish and Wildlife Agency is required. Other letters of support, designs, planning documents, permits, articles, scientific studies, etc. are optional but encouraged.

Project Application Instructions

Submission Instructions

Please combine all documents and attachments into a single pdf file. Number each page.
File names should include the submission date followed by the project name (Example "071512
Prairie Stream Project")
Submit electronically as an email attachment to <u>Steven Krentz@fws.gov</u> .
Please note, proposals should not exceed 10 pages, not including attachments such as photos, maps
letters of support, etc.

Please note, the Great Plains Fish Habitat Partnership will not consider:

- 1. Late requests.
- 2. Requests for projects or programs already completed.
- 3. Refunding projects, programs or items purchased before the project is approved or awarded.
- 4. Participating in or funding of any political campaign on behalf of any issues, organizations or candidates.

Deadline

Applications are due by January 14, 2025
Applications must be received by 12:00 pm Central Standard Time.

The GPFHP Partners Council will review and rank projects after receiving and selected applicants will await final approval and allocation of funds. Selected applications will be reviewed by the National Fish Habitat Board, the Department of the Interior and the US Fish and Wildlife Service for final funding approval in the late summer of 2025. Questions? Please contact Steven Krentz, GPFHP Coordinator, at Steven Krentz@fws.gov.

and Process

The GPFHP Partners Council will review and evaluate proposals based on the criteria listed below and will also consider project rankings from species conservation teams and U.S. Fish and Wildlife Service regional managers. A list of the projects that are selected for funding will be submitted to the National Fish Habitat Partnership Board and the U.S. Fish and Wildlife Service for final approval. Funds typically become available during early to mid-summer following grant approval.

In order to help project proponents put forward the best possible proposals, GPFHP has provided below a set of criteria and considerations by which projects are evaluated for funding. Project proponents must address these requirements, guidelines, and criteria in their project applications.

Requirements

- 1. Project must be consistent with specific GPFHP goals and objectives as outlined in the GPFHP Strategic Plan (available for download at http://www.prairiefish.org).
- 2. Project must benefit at least one of the GPFHP native species in its historic range.
- 3. Project proposals must be supported by state and/or federal fish and wildlife management agencies, or tribal governments, within project-area jurisdictions. Project application must include a signature and contact information for a 'sponsoring professional' from a relevant management agency.
- 4. If project is located on private land, a support letter from the landowner will be required.

General Criteria and Considerations

- Is the project proposal well written and complete; does it provide sufficient information on methodology and monitoring to evaluate the project?
- Does the project address more than one of the goals or objectives listed above and in the GPFHP Strategic Plan, or a priority need or limiting factor in a species conservation, management or recovery plan? If so, please reference and explain.
- Does the project protect or restore a natural process, and/or address a root cause of decline or habitat degradation? Is the project self-sustaining over time, or will it require periodic/regular maintenance? Please describe.
- Does the application establish that the project is technically sound and supported by the best available science, and are the project objectives realistic, measureable, and achievable?

- Does the project convey a large conservation benefit to a GPFHP priority species? If so, how? (Examples: project benefits a broad geographic area; project benefits a small geographic area with extremely high value). Does the project benefit multiple GPFHP or non-GPFHP species?
- Is the project part of a larger restoration effort? If so, describe the overall plan.
- Does the project have a high probability of being completed within the proposed project timeline?
- What % of total project funding is needed from GPFHP funding sources? Is the match clearly identified and secured?
- Is the project budget clearly described and reasonable? Is the benefit high relative to cost?
- Does the project enhance or relate to a previously funded GPFHP or NFHP project?
- Are project outcomes quantifiable; is there a clear explanation of how success will be measured and reported (e.g. stream miles, acres of habitat protected or restored, fish population trends)?
- Are there adequate assurances that the project will be monitored and the benefits maintained over the long term? Are there provisions for operation and maintenance?

Administrative Considerations

- Have required state and federal permits been acquired (i.e. NEPA, 404, SHPO)? Projects with completed environmental compliance will score higher in the ranking criteria.
- Who are the various partners that will participate in the administration and implementation of the project? Is the partner list diverse? Does the partner list include other NFHAP-recognized Fish Habitat Partnerships?
- Does the Application provide adequate information to assess whether the applicant or implementing partners have the experience and capacity to successfully achieve the goals and objectives as described in the proposal?
- Does the project include an outreach and/or education component? (Applicants are encouraged to work with the GPFHP Partners Council to coordinate media and public outreach to raise the profile of GPFHP-funded projects).
- Are the responsible parties for reporting requirements and the successful completion of this proposal clearly identified? Who is a point of contact should the Committee have questions regarding this project?
