# IOP Development Timeline

# NOTES

- Online version of tables is badly needed to improve readability
  - USACE, NPS, and BPA intend to contribute
- I am working on adding information to Ch 1 for other agencies
- Interagency coordination (Ch 4) is being discussed with the current Interagency Fish Passage Task Force

A large school of salmon swimming in clear, shallow water. The fish are densely packed and moving in various directions, creating a sense of a busy, natural aquatic environment. The water is a vibrant blue-green color, and the bottom is visible, covered in small, light-colored pebbles or sand.

**Are we going in the right direction?**

**What suggestions do you have to improve the content of the current draft?**

**Besides formatting of the tables, what suggestions do you have to improve the organization of the current draft?**

**Any other questions or comments?**

## WEBINAR RECORDING

### *The History and Founding Purpose and Vision of the National Fish Habitat Partnership*

BY CHRISTOPHER ESTES

Provides background information on the critical role  
that federal agency coordination plays in executing the  
Action Plan(s)
