

NATIONAL FISH HABITAT PARTNERSHIP

IN 2023

The U.S. Fish and Wildlife Service provided \$5.8 Million for 95 on-the-ground conservation projects across 24 States. Partners provided a 5.7-to-1 funding match with an additional \$33.3 million supporting projects.

SINCE 2006

The National Fish Habitat Partnership has implemented over 1,300 conservation projects spanning all 50 States.

OUR MISSION

is to protect, restore, and enhance the nation's fish and aquatic communities through regional partnerships improving the quality of life for the American people.

ON-THE-GROUND CONSERVATION

Our conservation projects have reconnected more than 6,000 miles of rivers and streams while conserving over 45,000 acres of river, lake, riparian, upland, estuary, and wetland habitat.

HOW WE WORK

The 20 partnerships conserve fish habitat and enhance fishing by improving and sustaining the nation's aquatic resources. We leverage federal, state, tribal, and private funding to achieve significant benefits to fish populations.

SUSTAINING PARTNERSHIPS

The National Fish Habitat Partnership invites corporations and businesses to assist our 20 Fish Habitat Partnerships across the U.S. by contributing to Beyond the Pond, a 501(c)3 organization established to support the National Fish Habitat Partnership.
